

# GEOSPATIAL CHALLENGE CAMP 2026

## OPEN CALL FOR COLLABORATION

### Why Geospatial Challenge Camp?

Geospatial Challenge Camp offers organizations and stakeholders the opportunity to develop innovative, data-driven solutions for **challenges in sustainable mobility and transportation**. Collaborators work alongside students and early-career researchers to test new methods, develop practical solutions, and strengthen their networks with experts in geospatial technology and sustainability.

### PARTNER ROLES

#### Challenge Theme Owners

Bring a real-world mobility or transportation challenge and collaborate with multidisciplinary teams.

#### Digital Data Providers

Share mobility or transportation-related location data for teams to explore and innovate with.

#### Mentors

Support teams with expertise in the theme, digital tools, or methods.

#### Policy Makers

Provide guidance on real-world information needs for improved decision-making and help link insights to sustainable policy development.

#### Partners / Sponsors

Provide support for the event's practical arrangements, such as venues and catering, or provide other organizational assistance.
