

GEOSPATIAL CHALLENGE CAMP 2025

Geospatial Challenge Camp aims at solving real-world sustainability challenges with open data and location technologies

OPEN CALL FOR RESEARCHERS AND STUDENTS

Why Geospatial Challenge Camp?

Geospatial Challenge Camp aims at engaging young scientists and students to solve real-world sustainability challenges with digital data and location technologies. In 2025, the broad topic of the challenge is **Health and well-being**.

Learning objectives

Improved confidence: in working in a multi-skilled team, knowing how to assess and communicate progress and results of the team work to stakeholders with diverse backgrounds.

Improved scientific skills: in conceptualizing complex location-related problems in the society, and better understanding of how these problems can be tackled with geospatial data, geoprocessing, automation and digital technologies

Skills to plan and manage team work: which runs over several weeks and manage sub goals, milestones and deliverables, and recognize the roles and responsibilities of members in a project team, linked with the team deliverables

Technical, hands-on competencies: to identify, use, assess, process and enrich geospatial data and digital technologies and provide novel solutions to needs posed by the stakeholders of the challenge

Important dates

Kick-off event	13.-14.2.2025 @ Maria 01 Startup Campus, Helsinki
Mid-term Seminar	28.3.2025 @ Turku
Final event	6.5.2025 @ Aalto University, Otaniemi Campus

Apply as participant at <https://challenge-camp.geoportti.fi>, deadline **24.1.2025**

Come to the kick-off event on **13.-14.2.2025**
